Mofluid Push Notification Release Notes 1.10.0

This release note lists down the features of Push notification:

Push notification allows an app to notify you of new messages or events without the need to actually open the application, similar to how a text message will make a sound and pop up on your screen.

There are two platforms of Push Notification available according to your mobile app.They are
1. ANDROID PUSH NOTIFICATION
2. IPHONE PUSH NOTIFICATION

Before installing Push Notification plugin make sure that Mofluid_Mobile_App_Builder_V1.10.0 is already installed with in your Magento store.
