Plugin Installation Guide

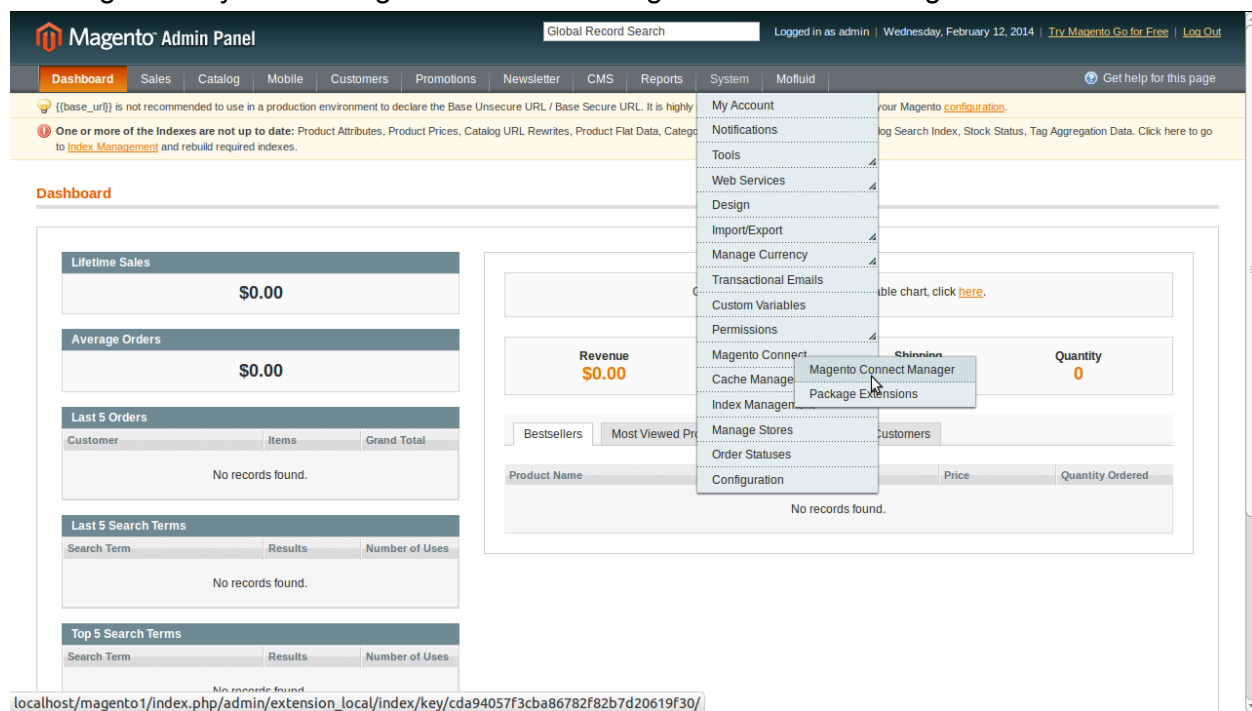

Magento Plugins are simply a great way of adding new features and functionality to your Magento powered stores. To install our Mofluid payment feature plugin from Magento Connect you simply need a plugin .tgz file.

Follow the instructions below to install the plugin to your site.

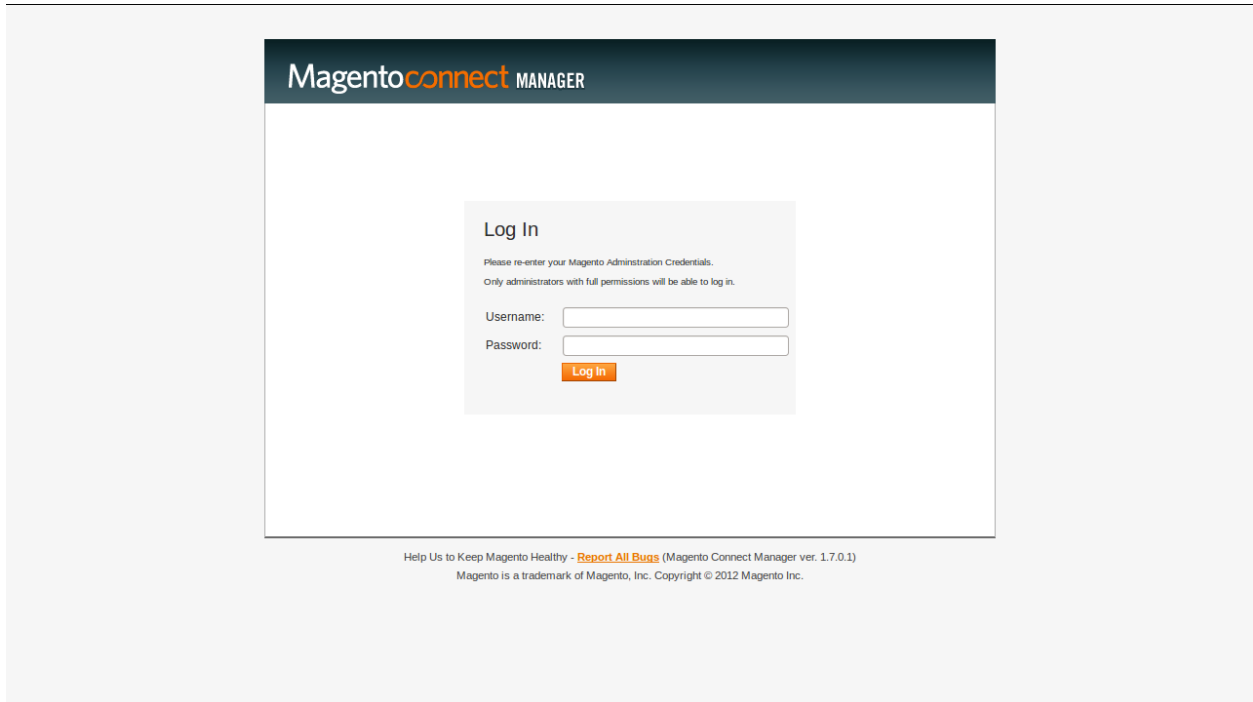

Note: Before installing this plugin make sure that Mofluid_Mobile_App_Builder_V1.11.0 is already installed within your Magento store.

Steps to install Magento Extension Using Magento Connect

1. Sign into your Magento store admin panel.
2. Navigate to System > Magento Connect > Magento Connect Manager.

3. Now Sign into Magento Connect Manager.

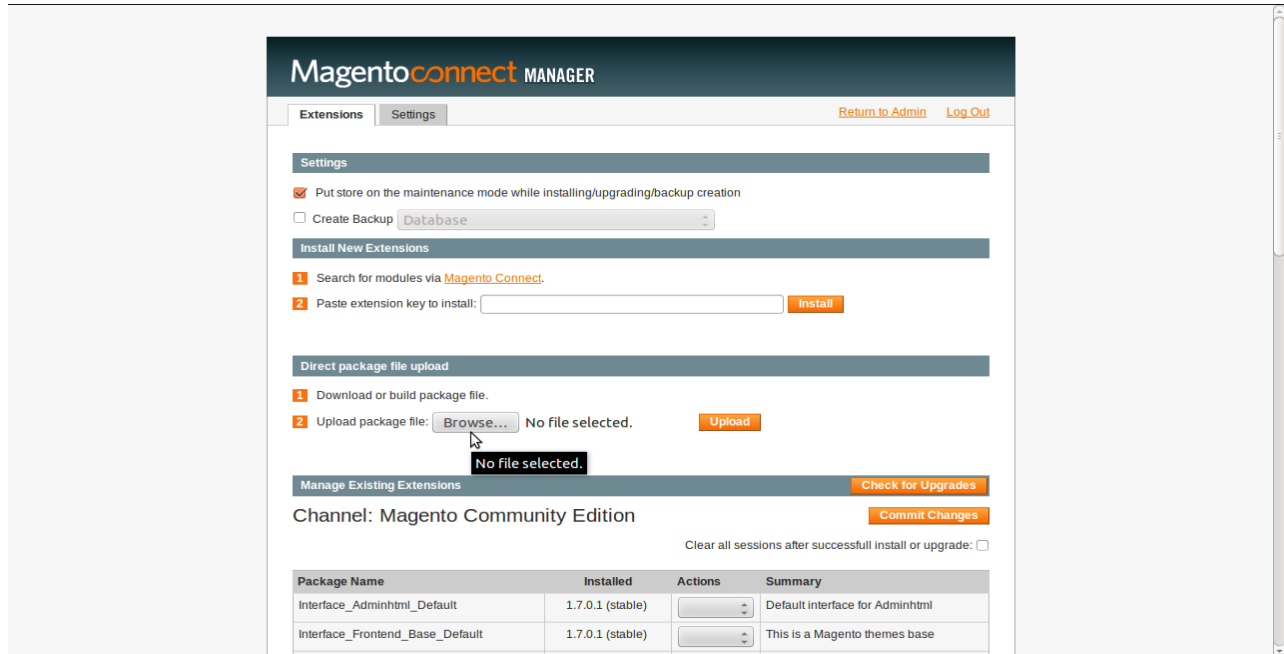

4. A window will open having two tabs Extensions and Settings. Now go to Setting select Magento Connect Channel Protocol as Ftp, Preferred State as Beta, Use custom permissions as No and Deployment Type as Local Filesystem, if Local file system Radio button is disabled then just give the write permission to your Magento Store whole folder Now just Click on Save Settings Button.

5.If you want to put your store on the maintenance mode while installing the Extension then

check the Put store on the maintenance mode while installing/upgrading/backup creation checkbox(Optional Step).

6.After saving settings click on Extension tab here in Direct package file Upload section you just have to upload a tgz file package of the extension and then click on Upload button.

The screenshot displays the Magento Connect Manager interface. At the top, there's a header with the 'Magentoconnect MANAGER' logo and navigation links for 'Extensions', 'Settings', 'Return to Admin', and 'Log Out'. The 'Settings' tab is active, showing options like 'Put store on the maintenance mode while installing/upgrading/backup creation' (checked) and 'Create Backup' (set to 'Database'). Below this is the 'Install New Extensions' section with a search bar and an 'Install' button. The 'Direct package file upload' section is highlighted, showing a 'Browse...' button and an 'Upload' button. A tooltip 'No file selected.' is visible over the 'Browse...' button. The 'Manage Existing Extensions' section shows a table of installed extensions.

Package Name	Installed	Actions	Summary
Interface_Adminhtml_Default	1.7.0.1 (stable)	[Dropdown]	Default interface for Adminhtml
Interface_Frontend_Base_Default	1.7.0.1 (stable)	[Dropdown]	This is a Magento themes base

```

Procedure completed. Please check the output frame for useful information and refresh the page to see changes.

Refresh

Above screen will be displayed after successful installation completed.

After Installation either manually or using .tgz file make sure that the following files and folders is having 777 permissions:

1. app/code/local/mofluid folder
2. app/etc/modules/Mofluid_Paymentauthorize.xml , Mofluid_Paymentcod.xml , Mofluid_Paymentebbs.xml , Mofluid_Paymentpaypal.xmlfile

Note : After installing the Mofluid Payment plugin on your store if you get your admin panel blank , then you have to close the compilation mode of yourstore .

To close the compilation mode, open the file `includes/config.php` and comment out the following line :

```
define('COMPILER_INCLUDE_PATH',  dirname(__FILE__).DIRECTORY_SEPARATOR.'src');
#define('COMPILER_COLLECT_PATH',  dirname(__FILE__).DIRECTORY_SEPARATOR.'stat');
```

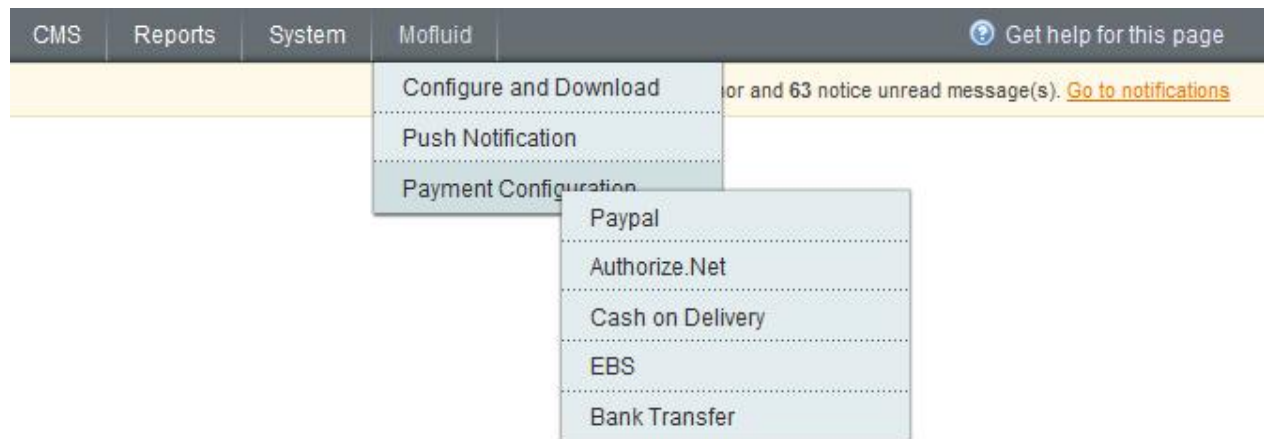

to

```
#define('COMPILER_INCLUDE_PATH',  dirname(__FILE__).DIRECTORY_SEPARATOR.'src');
#define('COMPILER_COLLECT_PATH',  dirname(__FILE__).DIRECTORY_SEPARATOR.'stat');
```

Clear the Cache

Site Admin User Guide

Once the Plugin has been successfully integrated with your magento site you will now return to admin panel you will see that a new extension with Payment Configuration feature is installed on your Magento store. It will be displayed in main navigation bar under Mofluid>> Payment Configuration.

Payment Configuration

Here you will get dropdown of Payment gateways depending on plugins installed in your store. You can enable these payment method with in your Mobile App depending on your own choice. The Mofluid supports following payment methods.

1. Paypal Payment Gateway:

PayPal is an international e-commerce business allowing payments and money transfers to be made through the Internet.

Checkout with PayPal – Faster. Safer. Easier.

PayPal is a service that enables you to pay, send money, and accept payments without revealing your financial details.

Stay secure and protected

PayPal uses the latest in data encryption and anti-fraud technology to keep your information secure, reducing the risk of online fraud.

Pay with flexibility

Register your credit card or debit card with your PayPal account. You can pay by simply choosing PayPal at checkout, logging into your PayPal account, and confirming your payment. They complete the process for you, without sharing your financial details with merchants and sellers.

It's quick and easy

Simply choose PayPal when you select a payment option on this site, and you can quickly open a PayPal account and add your payment method to complete your purchase. You can use your PayPal account to shop safer with millions of merchants and sellers around the globe wherever you see the PayPal logo. Every day, 100 million people use PayPal in 190 countries and with 21 different currencies.

Now Click on Paypal menu and following window appear.

a. Configuration :

- **Status** : Select status of paypal. You can enable or disable it depending on your choice. If status is enabled then only Paypal will appear as payment method for Mofluid app .
- **Business mail** : If you want to enable paypal with in your mobile app then enter business mail here.
- **Mode** : Select the mode of Paypal either Test or Live. Test mode should be selected when Test paypal account is used for payments.

After filling all the configuration click on save button on top right corner.

2. Authorize.Net Payment Gateway:

Since 1996, Authorize.Net has been a leading provider of payment gateway services, managing the submission of billions of transactions to the processing networks on behalf of merchant customers. Authorize.Net is a solution of CyberSource Corporation, a wholly owned subsidiary of Visa (NYSE: V).

Authorize.Net enables merchants to authorize, settle and manage credit card and electronic check transactions via Websites, retail stores, mail order/telephone order (MOTO) call centers and mobile devices.
