Plugin Installation Guide

Magento Plugin are simply great way of adding new features and functionality to your Magento powered stores. To install our Mofluid plugin from magento connect you simply need a plugin .tgz file

Once you obtain the plugin .tgz file from our Mofluid site, follow the instructions below to install the plugin to your site.

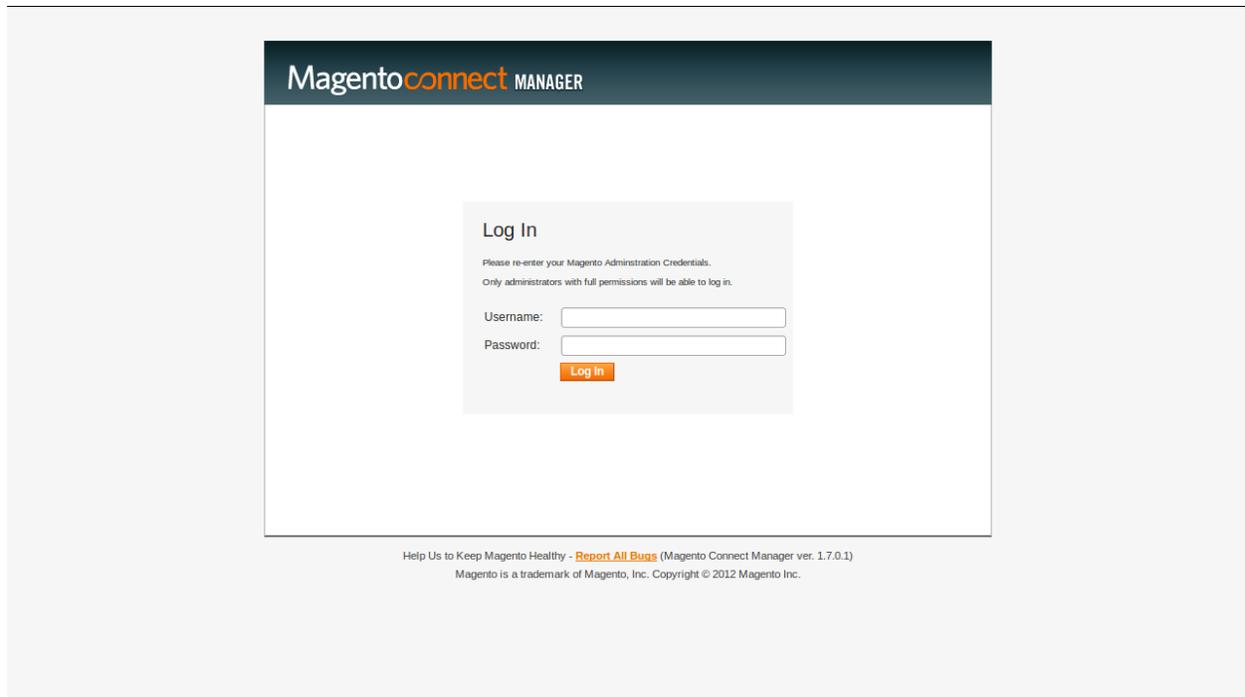

Steps to install Magento Extension Using Magento Connect

1. Sign into your Magento store admin panel.
2. Navigate to System > Magento Connect > Magento Connect Manager.

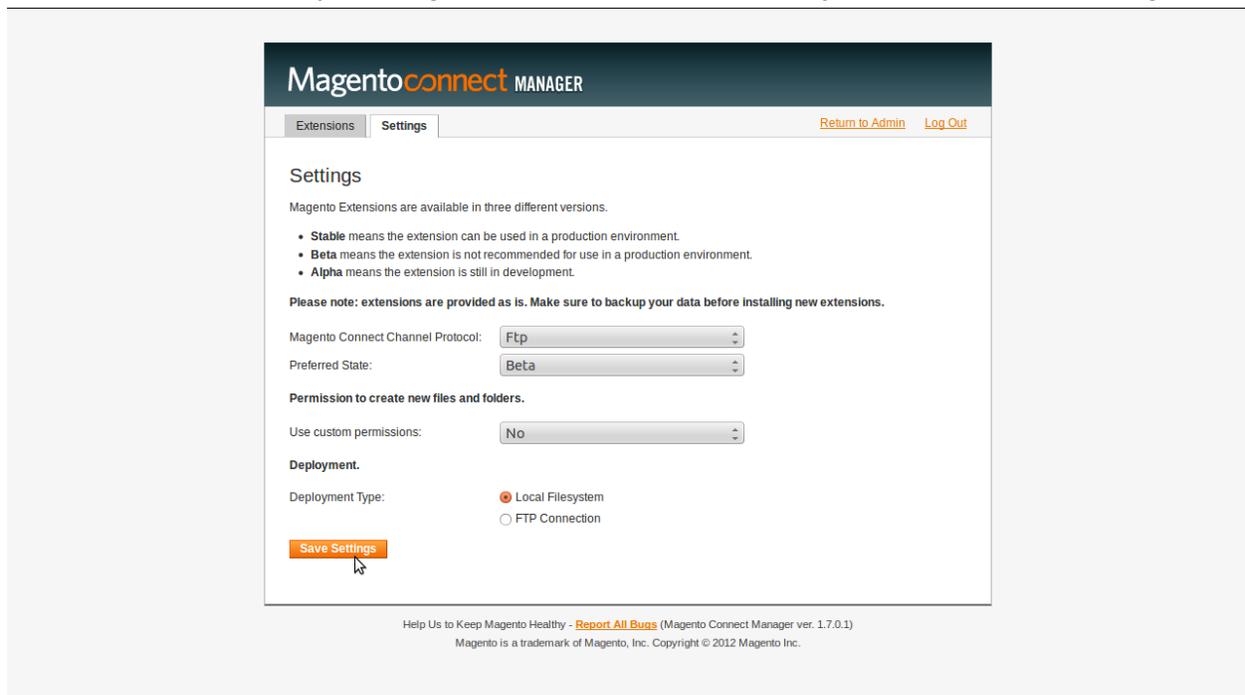

The screenshot displays the Magento Admin Panel interface. The top navigation bar includes the Magento logo, a search bar, and the user's login status. The main menu is visible, with the 'System' menu expanded to show 'Magento Connect' and 'Magento Connect Manager'. The 'Magento Connect Manager' option is highlighted, indicating the user's current location. The dashboard area shows various metrics such as Lifetime Sales, Average Orders, and Last 5 Orders, along with a table for Last 5 Search Terms. The URL at the bottom of the browser window is `localhost/magento1/index.php/admin/extension_local/index/key/cda94057f3cba86782f82b7d20619f30/`.

3. Now Sign into Magento Connect Manager.

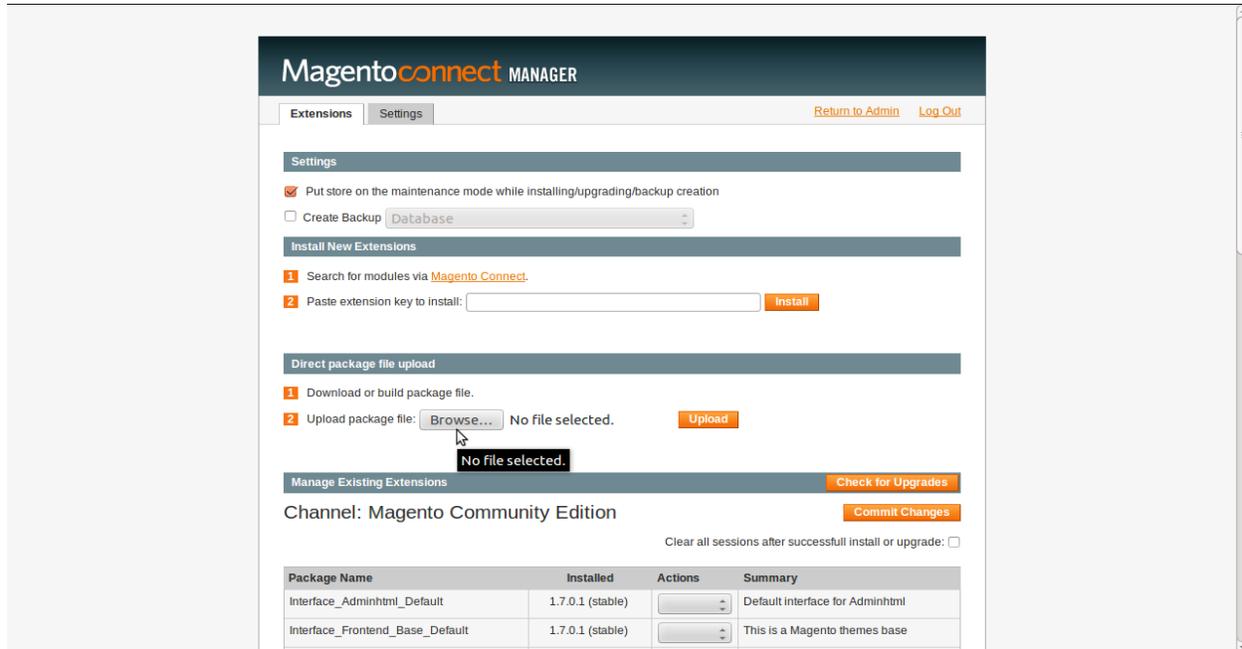

4. A window will open having two tabs Extensions and Settings Now go to Setting select Magento Connect Channel Protocol as Ftp, Preferred State as Beta, Use custom permissions as No and Deployment Type as Local Filesystem, if Local file system Radio button is disabled then just give the write permission to your Magento Store whole folder Now just Click on Save Settings Button.

5.If you want to put your store on the maintenance mode while installing the Extension then

check the Put store on the maintenance mode while installing/upgrading/backup creation checkbox(Optional Step).

6. After saving settings click on Extension tab here in Direct package file Upload section you just have to upload a tgz file package of the extension and then click on Upload button.

Magentoconnect MANAGER

Extensions Settings [Return to Admin](#) [Log Out](#)

Now Return to admin panel you will see that a new extension is install on your Magento store.
Steps to install Magento Extension manually

Steps for Server Admin:

1. Unzip File "**Magento_App_Builder_V1.9.2 zip**".
2. Now Find **app-code-local**, **app-etc-modules** and **js** Folder under **Magento_App_Builder_V1.9.2 zip Plugin Folder**
3. Find **Mofluid** folder under **app-code-local** Folder of **Magento_App_Builder_V1.9.2 Plugin**.
4. Copy **Mofluid** folder inside the '**app/code/local/**' path where your magento site hosted.(create local if it is not exists)
5. Find **Mofluid_Mofluidadmin.xml**, **Mofluid_Mofluidpush.xml** and **Mofluid_MofluidWS.xml** files under **app-etc-modules** Folder of **Magento_App_Builder_V1.9.2 Plugin**.
6. Copy **Mofluid_Mofluidadmin.xml** , **Mofluid_Mofluidpush.xml** and **Mofluid_MofluidWS.xml** files inside the '**app/etc/modules/**' path where your magento site hosted.
7. Find **mofluid** folder under **js** Folder of **Magento_App_Builder_V1.9.2 Plugin**.
8. Copy **mofluid** folder inside the **js** directory where your magento site hosted.

Steps for Site Admin:

1. Go to Magento Admin Panel(Backend) of your magento site and login
2. Go to System >>Cache Management >> Select All "Cache Type" and then click on "Flush Magento Cache"
3. Go to System >>Index Management >> Select All and then Select Action >>Reindex Data (from drop down list on right) and Click on Submit
4. Now go to System >>Configuration and Navigate to Advanced Panel (At Left Bottom Corner)
5. Click on Advanced link and then expand Disable Module Output
6. Look for "**Mofluid_Mofluidadmin**" , "**Mofluid_Mofluidpush**" and "**Mofluid_MofluidWS**" and Select Enable and click on Save configuration (if disabled).
7. All done. Now Enjoy to use Magento-Mofluid Plugin

Site Admin User Guide

Once the Plugin has been successfully integrated with your magento site you will find the Mofluid Menu in the Menu bar like :-

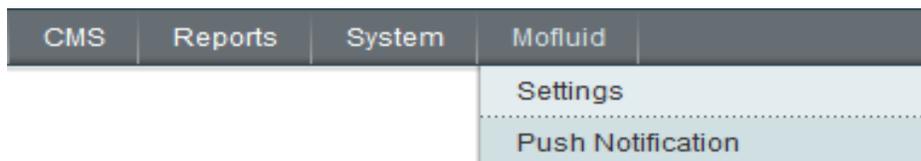

In the Mofluid Menu there is two option i.e.

- SETTINGS
- PUSH NOTIFICATION

SETTINGS

1. Now Select Settings from Mofluid Menu

2. You will see the Mofluid Admin Menu At left corner with Android Configuration and iPhone Configuration Pane. Now Select Android Configuration or iPhone Configuration according to your need to setup the applications settings.

Android Application Configuration

a) Application Configuration

Click on “Application Details” Submenu from Android Configuration Pane. You will see the screen like as below:-

The screenshot shows the Magento Admin Panel interface. The top navigation bar includes 'Mofluid Admin' and 'Application Details'. The left sidebar lists various configuration options under 'ANDROID CONFIGURATION' and 'IPHONE CONFIGURATION'. The main content area is titled 'Application Details' and contains the following fields:

- Mofluid Details:**
 - Mofluid User Id* :
 - Mofluid Secret Key* :
- Application Details:**
 - Application Name* :
 - Bundle ID* :
 - Version* :
 - Default Store Id for App* :
- Key Details:**
 - Release Key Type :
 - Key Store's Password* :
 - Private Key's Password* :
 - Validity (in days)* :
 - Common Name* :
 - Organization Name* :
 - Organization Unit* :
 - City or Locality* :
 - State or Province Name* :
 - Country Code* :

A 'Save Configuration' button is located in the top right corner of the form area. The footer of the page includes the URL 'www.magentocommerce.com/bug-tracking'.

Here You Find following field :-

e) Generate and Preview application

Once All Settings have been saved you can generate your iPhone application under Generate and Preview application page. This Page Displays the quick look of your settings with application details, payment details, theme details and assets details like as in android.

Now Click on Generate iPhone Application Button at top right corner of the page. It will create your app and Once your app will ready it display the Application Preview Button. You can see your application preview instantly and we recorded your response to deliver the Application in your registered mail within few days.

The screenshot displays the 'Generate Application' page in the Magento Admin Panel. The page is titled 'Generate Application' and includes a 'Generate iPhone Application' button in the top right corner. The main content area is divided into two columns. The left column contains configuration fields for the application, and the right column contains visual previews.

Field	Value
Mofluid Id :	pratfull.agarwal@ebizontek.com
Mofluid Key :	12345678
Application Name :	MyPushApp
Bundle Id :	com.mofluid.pushtest
Version :	1
Default Store :	1
EBS Status :	Disable
Paypal Status :	Disable
COD Status :	Enable
App Background :	FFFFFF
Default Text :	344575
Header :	C9CDF2
Title Text :	FFFF42
Button :	C9CDF2

Visual Previews:

- Application Logo:** A logo for 'MEGASTORE' with a shopping cart icon.
- Application Banner:** A promotional banner featuring a woman's face and text: 'Best Wishes', 'Happy Anniversary', 'GET Well Soon', and 'BIRTHDAY! So easy now!!'.
- Icon:** A small square icon with the 'Mofluid' logo.
- Splash Screen:** A white square with the 'Mofluid' logo and the tagline 'Mobile App For every store'.

At the bottom of the configuration area, it states: 'We will send the application build to your registered email.'

This screenshot shows the top portion of the 'Generate Application' page. The navigation bar includes 'Mofluid Admin' and 'Generate Application'. The 'Generate iPhone Application' button is highlighted in orange.

Note :

- i. If you change any setting in your application then once again generate application then view your Preview to view the changes of your application.
- ii. This application does not work on your localhost or your local IP so apply this plugin on your staging/production site.

PUSH NOTIFICATION

Push notification allows an app to notify you of new messages or events without the need to actually open the application, similar to how a text message will make a sound and pop up on your screen. This is a great way for apps to interact with us in the background, whether it be a game notifying us of some event occurring in our game world or simply the iPad's mail application beeping as a new message appears in our inbox.

Steps to enable Push notification for your app:

Go to Mofluid menu and select Push Notification

The screenshot shows the Magento Admin Panel interface. At the top, there is a navigation bar with the following items: Dashboard, Sales, Catalog, Mobile, Customers, Promotions, Newsletter, CMS, Reports, System, and Mofluid. The Mofluid menu is expanded, showing a sub-menu with 'Settings' and 'Push Notification'. The 'Push Notification' page is active, displaying a title 'Push Notification' and a brief description: 'Push notification allows an app to notify you of new messages or events without the need to actually open the application, similar to how a text message will make a sound and pop up on your screen. This is a great way for apps to interact with us in the background, whether it be a game notifying us of some event occurring in our game world or simply the iPad's mail application beeping as a new message appears in our inbox.' Below the description, there is an orange instruction: 'Configure your Push Settings and send notification to the devices. Select Subcategory from the left menu and go for Push Notification.'

IPHONE PUSH NOTIFICATION

On the left side of the Push Notification page there is Iphone Push Notification. Here there is two option with in it one is Set up Apple Push Notification On selecting it a page will open containing three fields. Upload Certificate with Private Key (.pem file) here you have to upload Certificate with Private Key a .pem file, Passphrase here you entered your passphrase and Push Notification mode here you select your Push Notification mode and then click on save configuration button.

Setup Apple Push Notification

[Save Configuration](#)

Apple Push Notification
